# The Braggs

The Nobel Prize in Physics 1915
"for their services in the analysis of crystal structure by means of X-rays"
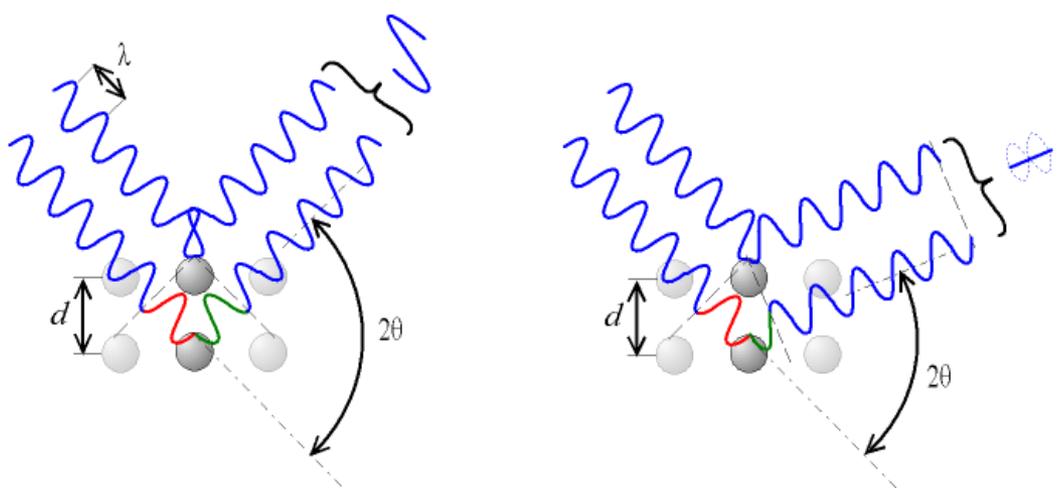

Sir William Henry Bragg
(1862-1942)

William Lawrence Bragg
(1890-1971)

http://en.wikipedia.org/wiki/Bragg%27s_law

$$2d \sin\theta = n\lambda$$

$$(n = 1, 2, 3, \cdots)$$

입방체 결정에서의 x-선 산란
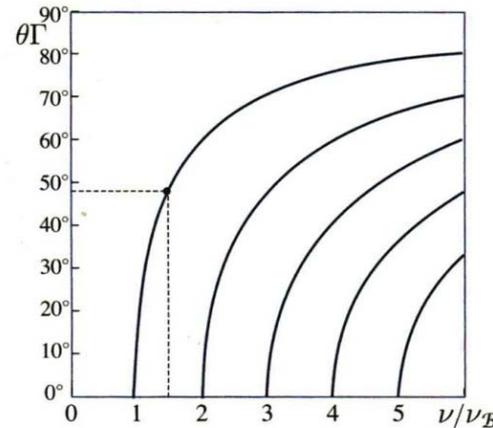

$$\mathcal{R}_N = \frac{\sin^2 N\varphi}{\sin^2 \varphi} R$$

$$\cos\theta = q\frac{\lambda}{2\Lambda} = q\frac{\omega_{\mathcal{B}}}{\omega} = q\frac{\nu_{\mathcal{B}}}{\nu}$$

$$\nu_{\mathcal{B}} = \frac{c}{2\Lambda}, \quad \omega_{\mathcal{B}} = \frac{\pi c}{\Lambda}$$
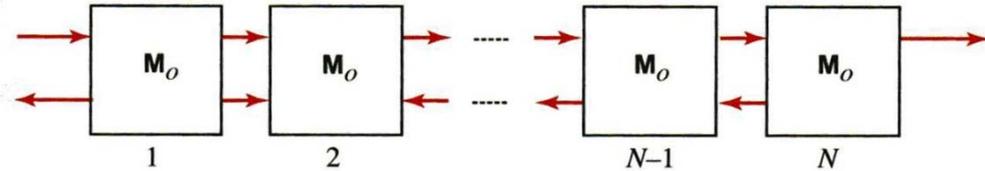

$$\theta_{\mathcal{B}} = \sin^{-1}(\lambda/2\Lambda)$$

$$\mathbf{M}_o = \begin{bmatrix} 1/t^* & r/t \\ r^*/t^* & 1/t \end{bmatrix}$$

$$\mathbf{M}_o^N = \Psi_N \mathbf{M}_o - \Psi_{N-1}\mathbf{I}$$

$$\Psi_N = \frac{\sin N\Phi}{\sin \Phi}$$

$$\cos \Phi = \mathrm{Re}\{1/t\}$$

Total-reflection regime
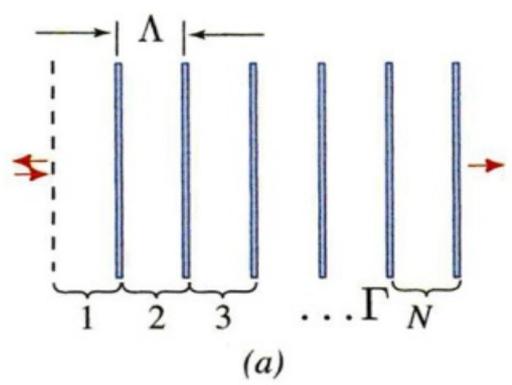

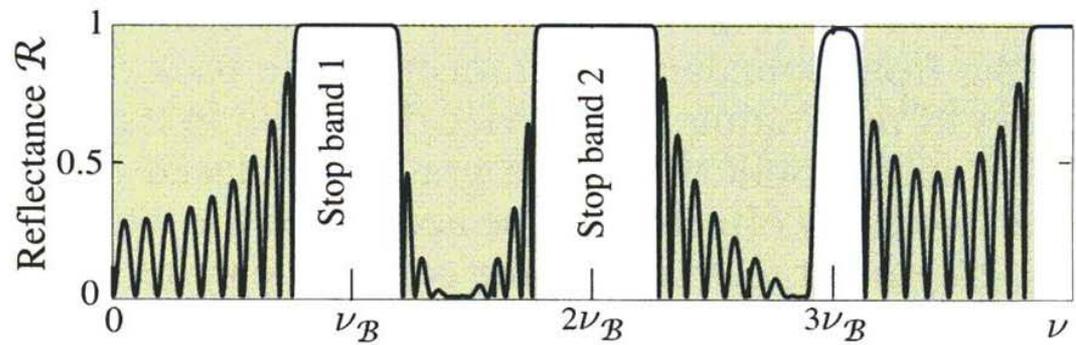

$$\cosh \Phi_I = |\mathrm{Re}\{1/t\}|$$

$$\mathbf{M}_o^N = \begin{bmatrix} 1/t_N^* & r_N/t_N \\ r_N^*/t_N^* & 1/t_N \end{bmatrix}$$

$$\Psi_N = \pm \frac{\sinh N\Phi_I}{\sinh \Phi_I}$$

$$\mathcal{R}_N = \frac{\Psi_N^2 \mathcal{R}}{1 - \mathcal{R} + \Psi_N^2 \mathcal{R}} \qquad \mathcal{R}_N \approx \Psi_N^2 \mathcal{R} = \frac{\sin^2 N\Phi}{\sin^2 \Phi} \mathcal{R}$$

(a)

(b)

(c)
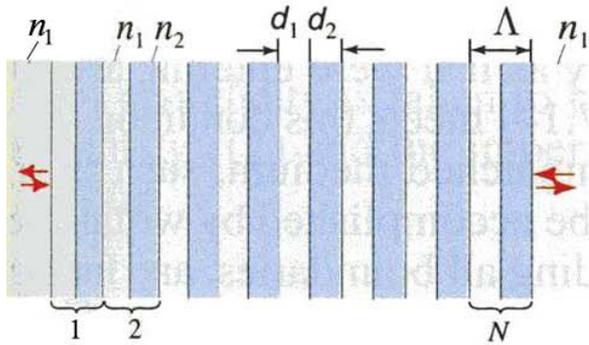

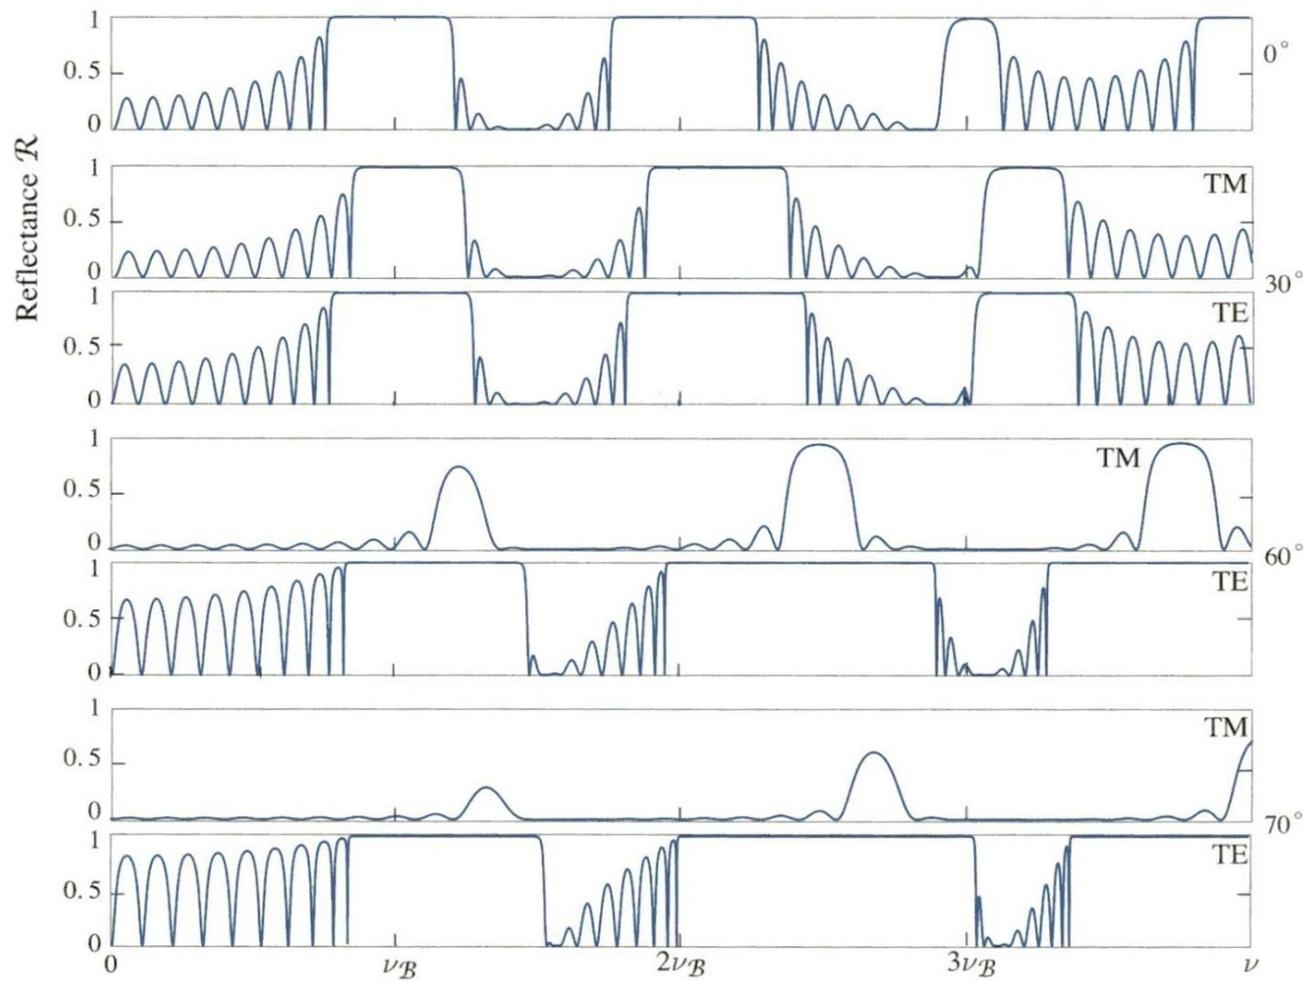

Fiber Bragg grating sensor

Broadband source

Optical Spectrum Analyzer
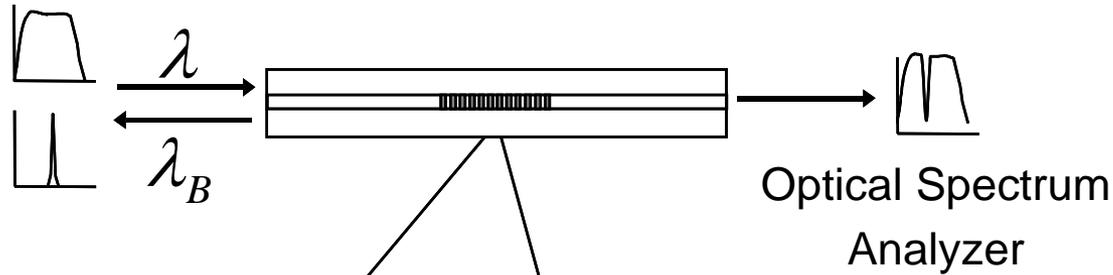

❿Bragg Wavelength

$$\lambda_B = 2n_{eff}\Lambda$$

❿ Λ
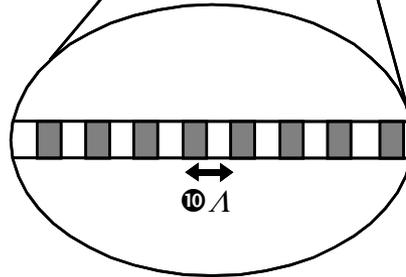

- 특정 파장만을 반사
- 반사파장의 변화로부터 물리량을 측정
- 측정점의 위치, 크기가 고정 → 준분포센서

Example of FBG sensor

Load measurement based on multiplexed FBG sensor system

FBGs

- Wavelength encoding
→ Noise에 매우 강함
→ 다중점 센서

- Intrinsic structure
→ Easily embedded
→ Easily locatable

- Cost-effective

LOAD MEASUREMENT USING OPTICAL FIBRE SENSORS

Structure under load e.g. yacht mast subjected to wind and wave loading

EMBEDDED FIBRE SENSOR — 0.25mm, 2mm
Bragg grating strain sensor produced by internally modifing optical fibre with UV laser

MAST SECTION
Optical fibre sensors are embedded into structure and are so small that they form part of the laminate structure

MAST SECTION
Optical signal splitting at fibre exit from laminate

HARDWARE
Optical Fibre Strain Sensor System (OFSSS) which acquires and initially processes data

User Interface with touch screen display provides up-to-date information on the status of every sensor

TYPICAL REAL-TIME DISPLAY

Data acquisition facility enables historical load data to be examined

HISTORICAL DATA DISPLAY

ANALYSIS
Remote data analysis by specialist engineer
